Ivan Malyarevich

Senior Frontend / Web Engineer (Angular, React)

Germany +49 151 626 40543 ivanmalyarevich@gmail.com LinkedIn: linkedin.com/in/ivan-malyarevich/

SUMMARY

Senior Frontend Engineer with 10+ years of experience building scalable, high-performance web applications using **Angular**, **AngularJS**, **React**, and **TypeScript**. Strong expertise in state management (**NgRx**, **Redux**), frontend architecture, and performance optimization, including improving **Core Web Vitals** and **Lighthouse** performance scores. Proven track record of enhancing UX, reducing load times, and implementing frontend best practices based on Lighthouse audits and modern web performance standards. Acting as an AI-oriented engineering advocate, driving AI adoption within projects, advising on frontend architecture and intelligent feature integration, and leveraging modern **AI technologies** to enhance product capabilities, development efficiency, and business impact while collaborating with product managers, backend engineers, and cross-functional **Agile** teams.

EXPERIENCE

Co-Founder / Frontend Advisor — *Onsite, US*

BrandHope — 01/2025 - Present

- Implemented **AI tools**, including **AI APIs** and workflow automation, boosting feature delivery by **60%.**
- Optimized frontend performance across applications, improving responsiveness and Core Web Vitals by **45%** while ensuring cross-browser compatibility.
- Optimized product decisions and UX strategy, improving team efficiency **50%** with NgRx, Redux, **REST APIs**, **GraphQL**, **WebSockets.**
- Mentored developers, boosting code quality **40%** with **Frontend best practices, Jasmine**, **Jest**, **Cypress, Git, Webpack, Vite, npm/yarn, Docker, Jenkins, CI/CD.**

Senior Software Engineer — *Remote, BG*

TBI Bank — 09/2021 - 08/2025

- Developed and maintained a large-scale Angular application, increasing operational efficiency by **35%** using **Angular,** TypeScript, NgRx, and REST APIs.
- Planned and delivered frontend features across multiple releases in close collaboration with product managers and backend teams within Agile sprints.
- Improved user experience and reduced user complaints by **40%** through UI/UX improvements, Jasmine unit tests, and **Chrome DevTools** profiling.
- Implemented user-facing interfaces and integrated frontend services with a strong focus on browser compatibility and performance.
- Optimized application performance using lazy loading, Webpack optimizations, and Docker, achieving up to **20% performance improvements**.
- Mentored junior developers, reducing onboarding time by **50%** and improving overall team delivery speed.
- Streamlined development workflows using Git (**Bitbucket**) and Jenkins CI/CD pipelines, reducing debugging and review cycles.
- Applied AI-assisted tools (**GitHub Copilot, ChatGPT, Ollama**) to accelerate routine development and code review tasks.

Frontend Specialist / Core Team Developer — *Onsite, UA*

State-Owned Enterprise — 01/2020 - 08/2021

- Built and enhanced Angular, AngularJS, and React-based web applications for client-facing government platforms.
- Streamlined onboarding workflows, increasing client acquisition by **33%**.
- Developed responsive online forms using **Material UI** and **Tailwind CSS**, increasing submission rates by **25%**.
- Migrated legacy frontend and data solutions to modern architectures using **MongoDB,** GraphQL, and REST APIs.
- Reduced data retrieval time by **67%** through optimized state management (NgRx) and frontend performance tuning.

Computer Science Instructor — *Onsite, UA*

Government Institution — 09/2019 - 12/2019

- Delivered hands-on training in **HTML, CSS, JavaScript**, and modern frontend frameworks.
- Designed structured learning programs, helping **90% of students** achieve proficiency in TypeScript, React, and Angular fundamentals.
- Introduced Git-based version control and debugging practices using Chrome DevTools.
- Maintained course materials and practical assignments to ensure consistent learning outcomes.

Software Developer — *Hybrid, UA*

Outsource — 09/2014 - 12/2019

- Led frontend development across multiple client projects using Angular, AngularJS, and React.
- Reduced page load times by **50%** through JavaScript, CSS, and asset optimization.
- Integrated REST APIs and WebSockets to support real-time data updates.
- Conducted code reviews and refactoring, reducing production bugs by **40%**.

SKILLS

Core Frontend:	Angular, AngularJS, React, JavaScript (ES6+), TypeScript, HTML5, CSS3 / SASS, Web Accessibility (A11y, WCAG 2.1, ARIA)
State Management & APIs:	NgRx, Redux, REST APIs, GraphQL, WebSockets
Styling & UI:	Tailwind CSS, Bootstrap, Material UI, Ant Design
Tooling & DevOps:	Git (GitHub, GitLab, Bitbucket), Webpack, Vite, npm, yarn, Docker, Jenkins, CI/CD
Performance & Quality	Core Web Vitals, Lighthouse, Performance Optimization, Frontend Best Practices
Testing:	Jasmine, Jest, Cypress
AI & Productivity Tools:	GitHub Copilot, ChatGPT, Ollama, DeepSeek
Backend & Other:	Node.js, Express, MongoDB, AWS

EDUCATION

Master's in Computer Science and Engineering
